JAPAN EXTERNAL TRADE ORGANIZATION
(JETRO)

by

Staff, Economic Research Center*

The Japan External Trade Organization(JETRO) is a semi-governmental organization responsible for the coordination of Japan's trade initiatives and the execution of the country's trade policies. They not only promote Japan's exports but also assist other countries to increase their exports to Japan.

In their effort to promote Japan, JETRO puts out a wide range of publications, which include information about Japan's import market, current international trade issues, general information related to doing business in Japan, and results of market surveys in Japan which is also published in a number of languages. Among its promotional efforts, JETRO sponsors trade promotion and product development seminars, whereby overseas guests are given the opportunity to examine ways of increasing exports to Japan.

For more information on how JETRO may help you, write: Japan External Trade Organization, 2-2-5, Toranomon, Minato-Ku, Tokyo 107, Japan.

AMERICAN-MADE SAKE COMPETES IN THE JAPANESE MARKET

The following article appeared
in the "Japan Report", Vol,XXV, No.10

Leading Japanese sake brewing companies are becoming increasingly worried over the possible massive inflow of California sake. Officials of the Japan Sake Makers Central Association have predicted that well-mellowed sake from California will give strong competition to Japanese sake because the American sake brewers were using cheap California rice as its raw material.

Japanese rice retails at three time the price of foreign rice due to the time-honored Government policy of fixing the price of rice at a much higher level than in foreign countries, according to Association officials.

The American sake brewer is Numano Sake Company of Berkeley, California. It is operated by Takeshi Numano, an American of Japanese ancestry. He started brewing sake in 1977 to cope with steeply increasing import prices of Japanese sake after the sharp appreciation of the yen against the U.S. dollar. Mr. Numano was originally a liquor dealer.

The sake brewery, owned jointly by Numano and an American partner, is currently exporting to Japan some 3,000 bottles of sake, each containing 720 milliliters of brewed liquor, every month. The total volume of California sake sold in Japan is expected to reach some 18 kiloliters annually. This amount, however, is not a big threat to sake makers in Japan, where consumers down some 162 million kiloliters annually.

The American-made liquor is now only distributed to bars and snack shops in major cities throughout the country.

According to officials of Numano Trading Inc, in Yokohama, it will be some time before it is sold directly to the public.

The California sake is at present sold at ¥800-900 per bottle, a little higher than domestically-brewed sake, because of the extra dealer's margin. But in the near future, the American sake will be sold at rather competitive prices compared with the traditional Japanese sake brewed in Nada, Hyōgo Prefecture, and other locations in Japan, according to officials of the Japanese Sake Association.

GUAM FACES COMPETITION

by

Staff, Economic Research Center

Sri Lanka in the near future hopes to be in direct competition with its neighboring countries, as far as banking and finance are concerned, according to 23rd October 1979 issue of "The Asia Letter".

This island nation already has four local banks, six foreign banks and two major international banks which have just begun operations this year. In addition to this already impressive list, a few more foreign banks will commence operations in Sri Lanka shortly. One of these foreign banks is Citibank of New York, which will mark the initial entry of a large American financial institution into Sri Lanka.

The President of Sri Lanka is J.R. Jayewardene. His government has been highly praised for the successful reconstruction of their country's economy. As it stands, it seems everything is being done or will be done by the Jayewardene government to promote Sri Lanka as a major financial center. Even the country's banking laws may be altered in the near future, in whatever way necessary to make Sri Lanka a more appealing foreign investment area.

Because of all the changes that have occured within the past two years and all the changes already in the planning stage, many foreign investors are now looking into the possibilities of investing in business ventures in this island nation.

The progress report on Sri Lanka's economic state should make for very interesting reading in the near future.

MACAO WITH 9.6 SQUARE MILES ACCOMODATES 3 MILLION TOURISTS

By

Staff, Economic Research Center

According to a story in the 25th September 1979 issue of "The Asia Letter" Macao accomodates 3 million tourists annually in spite of its tiny size (9.6 square miles). In comparison Guam (212 square miles) accomodates tourists at a current rate of approximately 200,000 annually.

Even though China claims all the territory that comprises the tiny colony of Macao, they want the Portugese to stay, at least for now. Construction projects and foreign investments are up. Plans for many new hotels are being made along with speculation of a new international airport. These improvements are seen as necessary in order to support the growing tourist industry which may reach 3.5 million persons annually this year. Gambling appears to be the biggest lure for attracting the tourists. Most of these tourists come from Hong Kong, but an increasing number are coming from Japan.

Considering the size of Guam, we may have the capacity to accomodate many more tourists.

R = Revised 1/ Includes operative builders P = Preliminary

Note: The Department of Labor no longer classifies establishments by type of owner, that is, by private and public sectors. Government establishments are not classified by their primary economic activity. This change is primarily reflected in the number of employees in the services, public administration, and transportation and public utilities industries. Data include full-time and part-time employees who worked during or received pay for any part of the pay period which includes the 12th day of the survey month. Proprietors, self-employed, unpaid family workers, domestic servants and military personnel are excluded.
